The Ocean ISO UltraLite liferaft utilizes carbon composite technology to achieve a significant weight reduction, compared to the traditional range of Ocean ISO liferafts. It also includes a high-tech inflation system to ensure an efficient inflation process. The raft has been 3rd party approved to ISO9650 Type I Group A requirements by the Notified Body RINA.

This liferaft offers the huge benefits of a lightweight solution for yacht designers but most importantly larger liferafts are now easier to handle and deploy.
